Rock, Hard Place— Say "Hello" to inReach™

Have you ever wondered what you would do if you found yourself in a remote location and needed help? DeLORME's inReach™ device is the answer to just that. The small, user-friendly product—developed by a unique partnership between Iridium and DeLORME—gives users access to affordable, global, two-way satellite communication. Helix utilized its expertise in designing ruggedized enclosures to protect this valuable technology. An inReach™ device in your pack could be just the security blanket you need the next time you leave the trail.

Since its announcement in June 2011, the inReach™ device has already won a mountain of awards. inReach™ was quickly adopted by many outdoor enthusiasts as an essential travel companion and virtual safety net. The Helix Design team is pleased to have been a part of such a successful and widely accepted tech-innovation.

The combination of our ruggedized product development experience and DeLORME's leadership in navigation made for a rock and a hard place that's a lot less intimidating.

Call the Helix Design sales team @ 603.644.1408 the next time you need help developing a product that is too important to fail.
