Rock, Hard Place - say "Hello" to inReach

Have you ever wondered what you would do if you found yourself in a remote location and needed help? DeLORME's inReach device is the answer to just that. The small, user-friendly product—developed by a unique partnership of Iridium and DeLORME—allows users to gain access to affordable, global, two-way satellite communication. Helix brought its expertise in designing ruggedized enclosures to protect this valuable technology. That's right, you may not need to consider nibbling on your arm the next time you find yourself in an unfortunate situation.

Since its announcement in June 2011, the inReach device has already won a mountain of awards. inReach was quickly adopted by many outdoor enthusiasts as an essential travel companion and virtual safety net. The Helix Design team is pleased to have been a part of such a successful and widely accepted tech-innovation.

The combination of our ruggedized product development experience and DeLORME's leadership in navigation made for a rock and a hard place that's a lot less intimidating.

Call the Helix Design sales team @ 603.644.1408 today for assistance with developing your next award winning product. Our team is ready for action in 2012. Please consider having Helix participate in your next project adventure.
